Kemal Erkan, CEO
United Medical
161 Becks Woods Drive
Bear, DE 19701

Dear Mr. Erkan,

It gives me great pleasure to announce that 60 of your **United Medical** ambulatory sites as having achieved the **Stage 6** designation of the HIMSS Analytics Ambulatory Electronic Medical Record (EMR) Adoption ModelSM. This distinction honors your organization's accomplishments to implement technology solutions that have the ability to improve patient safety and quality of care and continuity of care across the care spectrum.

Currently, only **3,385** ambulatories in the United States, including yours, carry a Stage 6 designation. **United Medical** ambulatory sites are great examples of how a vision can become reality in the world of healthcare information technology.

We know that it takes executive commitment, support and a great team of healthcare professionals to achieve this advanced level of information technology adoption. We encourage you to publicize your accomplishments, so that other organizations may follow your example...and come to you for assistance and guidance as they embark on a similar journey.

We also believe that Stage 6 ambulatory facilities are well positioned to be successful with achieving the American Recovery and Reinvestment Act (ARRA) goals, measurements, and funding for Meaningful Use. We hope you accomplish all of your organization's potential in meeting the ARRA objectives.

Again, congratulations on your exemplary work in leading the way towards healthcare IT adoption that improves patient care.

Please don't hesitate to contact us if we can be of assistance.

Sincerely,

H. Stephen Lieber, CAE
President & CEO, HIMSS
Chairman of the Board HIMSS Analytics
